f.o.b. Yokohama

Celery Cabbage, Sakata's Imp.  
 Peking. Electro. \$ 1.00

VEGETABLE SPAGHETTI, selected strain

This remarkable vegetable, which belongs to Cucumber family, grows and sets fruits freely just like Squash. The smooth creamy white skinned fruits look something like Vegetable Marrow but with more symmetrical long oval shape. They measure about 8 in. long and about 4 in. in diameter.

You pick the fruit when well matured and cook it (as whole fruit without cutting or skinning) in boiling water for about 20 minutes, take it out and cut as shown in the picture, and you will find a quantity of stringy Spaghetti-like contents which is quite tasty when seasoned with venegar, sauce, or cooked in other ways.

The fruits have wonderful keeping quality as they can well be stored until late spring.

The following three points are important.

1. Do not pick fruits too young. Leave them until fully matured.
2. Before cooking, do not skin or cut the fruits. They must be cooked as whole.
3. Do not cook the fruits too long as this will soften the stringy texture of the contents.

Vegetable Spaghetti. Electro. \$.80
